Interview With Sea Mter Atson. The Hon. William B. He rerily ought to have had the nomination in 1876, but I think it was better for the Republican party as it is. The Hayes policy gave us a chance to test the real feeling of the South, and now we know how to meet that section. After Blaine comes Sherman. He will carry Ohio, and is a strong man. However, he is not so well known or liked by the mas of the people. Grant, I think, woul carry some of the Southern States. "What do you think of the disintegra-

New York World. 1

If the Democratic party cannot elect in 1880 such a candidate as Mr. Bayard, the Democratic party certainly can elect no other and interior candidate. In the mat-ter of his fidelity to hard money, which simply means his honesty on the great question of a government currency, and of his hostility to filehing from the purse of the nation, Mr. Bayard assuredly has a better record than Mr. Sherman or Mr Blaine. Indeed, his record on the question of a government currency is of such a character that if the election of 1880 is to turn on that point it seems to us clear that Mr. Bayard, instead of being sure to be beaten by any Republican but Grant, would be tolerably sure to beat any Republican ex-cept Grant. In his latest communications to the country, just before leaving the White House, General Grant took considerable puns to put himself side by side with Mr. Bayard on this issue of hard money. Does the Sun think the loyalty of General Grant to a sound currency likely to prove a source of weakness to his candidacy should the Republican party of the nation ask him to assume its leadership in the nation as the Republican party of New York has already asked his devoted friend and champion to assume its leadership in and champion to assume its leadership in New York? Certainly in this great State of New York, which is likely to play an important part in the election of 1880, no Democrat can come anywhere near carry-ing a majority of the electoral votes who does not stand pre-cisely where Senator Bayard has
